# REVIEW OF MARKETS

# FINANCIAL AND COMMERCIAL

Stocks, Money, Exchange, Bonds, Grain, Cotton, Provisions, Etc.

New York, Jan. 23.-Speculation in stocks to-day passed previous high resord marks, both in volume and in prices attained. Transactions in stocks prices attained. Transactions in excess of bonds reached \$9,016,000. Trading was furious at the opening and the highest prices were reached in most stocks on the initial bulge, with advances of 5 to 10 points in some cases. There were subsequent violent breaks on enormous realizing of profils. The market then became quieter until another exhibition of strength in the afternoon trading, when the Coalers and Gould stocks got to the best. The bank statement, which seemed to assure easy money, was the mainspring in the market's strength. London opened firm, but declined on operators taking profits, and then steadied on curb transactions. The extent of the public's interest in the market was reflected by the congestion of business on the stock exchange and in the commission houses. For instance it was announced to a broker's customers to-day that all orders would be taken subject to delay, as their representative on the floor was unable to attend to all of their business, and that floor brokers were refusing orders, as they had more on their hands than they could execute. It was the usual thing to refuse to accept stop loss orders, as the trading was too violent to guarantee their execution. An incident conveying an impression of the extent of the early advance was that of a customer who had given an order to sell a block of an active issue, and who received \$20,600 more than the order called for, owing to the violent rise while the order was being executed. Large operators were believed to inave realized heavily in the early dealings, but there was said to be considerable taking back of stocks in the afternoon that had been sold earlier, and round amounts of stock were covered by the traders. Some of the more sensational movements were an advance of 19% in Pittsburg. Clincinnati, Chicago, and St. Louis rose \$15. After the early rise the heavy selfmg movement dropped prices rapidly, Brooklyn Transit, Union Pacific and St. Pennsylvania, 6½: Twin City Rapid Transit, 54; Ontario and Western, which jumped 5% on transact

5% on transactions of over 200,000 shares.

The belief seemed to be that the company would benefit by the better conditions which were said to exist in the anthracite coal trade. The Grangers were rather quiet in the afternoon. Speculative interest centered in the specialties. Notwithstanding the undertone of strength in speculation many shares closed notably lower. The more prominent were Union Pacific preferred, Omaha, Federal Steel, Brooklyn Transit, Consolidated Gas. New York Air Brake suffered a loss of 3½. The market closed strong.

Railroad bonds showed considerable strength during the forenoon and record prices were obtained in many ismues.

In the subsequent dealings the market displayed considerable strength during to the end.

United States old 4's compon and the 5's coupon advanced ½ in the bid price. The total sales of stocks were 1,020,000 shares.

### CHICAGO MARKET.

Wheat, Corn. Oats. Provisions. Lard. Short file. Etc.

Chicago, III., Jan. 23.—Wheat speculators affected by the excitement in Wall street to-day Ignored all bearish news, and under the vigorous buying that prevailed May wheat closed at an advance of 1½c. Corn was alded by the same indefinite, but powerfully effective speculative sentiment and advanced le. Oats benefited to the extent of ½c. and provisions gained 12½c. in pork, 7½c. in lard and 5c. in ribs.

By order of the Light-House Board: FRANCIS J. HIGGINSON, Commodure, N. S. N., Chairman, NEW USE OF THE KANGAROO. Surgeons at Oakland, on the bay opsurgeons at Gakland, on the bay opposite San Francisco, have resorted to
the use of kangaroo tendons to tie up
the fractured bones of a broken leg, in
order that the patient may have use of
his knee while the bones are knitting
together, says an exchange. He is a
nainter and this is the second time he
has broken a bone of his left leg in the
same place. "To rest the fracture and
place the limb in a plaster cast until
the bone knits would destroy the use
of the knee joint," said Dr. Stratton.
"The knee had already become somewhat stiff from the first setting. We
have decided to make an incision in the
leg as the point of the fracture of the
bone and will bore holes in the broken
hones. Through the boles we will draw
kangaroo tendons, and they will hold
the benes together until they knit, without the use of plaster cast about the
knee. This will carable the knee to be
bent each day while the bone is knitting. Kangaroo tendon is as strong as
silver wire. It is taken from the tail
of the kangaroo, and being animal in
its nature it is absorbed, and the leg
does not have to be again cut open, as
is necessary when silver wire is used."
